RELEVANT WORK EXPERIENCE

Sr. SDET (Senior Software Development Engineer in Test), Vanco, Remote. 01/2023 – Present
- Lead QA efforts across multiple teams, fostering collaboration, performing continuous testing and coordinating FE & BE test automation initiatives for both mobile and web application.
- Engaged in agile project planning, designing testable user stories, and performing continuous testing using Jira.
- Created API Test Automation frameworks from scratch using Postman and integrating into CI/CD with AzDevOps.
- Served as Release Manager for a cross-platform application, overseeing releases to iOS App Store and Google Play.
- Pioneered a cross-platform (iOS & Android) Appium-based test automation framework in JavaScript using WebDriverIO and BDD with Cucumber for Vanco's React Native app.

SDET (Software Development Engineer in Test), Vanco, Remote. 04/2022 – 12/2022
- Developed from scratch an end-to-end UI test automation framework using Cypress.
- Created from scratch and maintained API test automation suites using Postman.
- Integrated test automation with CI/CD pipelines using YAML in Azure DevOps.
- Actively participated in agile project planning, executing acceptance tests using Jira and TestRail.
- Enhanced DevOps processes as Release Manager, overseeing releases and managing Azure resources.
- Led cross-team data migration testing efforts, ensuring data integrity across hundreds of thousands of records.
- Mentored QA Engineers and SDETs, participating in test automation code review from other teams in GitHub.

QA Engineer, PerseusX Incorporated, Remote. 09/2021 – 04/2022
- Worked on a data & analytics project for PepsiCo, contributing to the development of a test strategy and test scripts for the ETL process using Azure Data Factory (ADF) pipelines.
- Created an automated regression test suite from scratch using Python, Selenium, and Pytest.

Test Automation Engineering Associate, Accenture, Remote. 06/2021 – 09/2021
- Created test plans, test suites, and test cases using Azure DevOps in an Agile (Scrum) environment.
- Ran and maintained automated tests built in Cypress.
